Ksenija -- thank you, looks good! Two revisions noted below, and also -- could you pull up the footnote into the intro, making it a basic sentence explaining that, in general, tire processing consists of rubber particle size reduction and removal of metal and fabric (from the steel belts), and then also explaining ambient vs cryogenic? (I think without the contrast of cryogenic the 'ambient' is confusing.

Please send it on with those revisions.

Thank you!!!

Subject: RE: QUICK REVIEW REQUESTED: Site tour summaries

Hi Charlotte,

We have been asked by the Office of Science and Policy in ORD, if we could get this summary to them later today, so I was wondering if it would be possible for you to review it pretty soon. (It is only one short page.)

Thank you,
Ksenija

Hi Charlotte and Cheryl,

If you have not yet started your review of the word document, attached is an updated copy with the note included per Nicole's comment below.

Thank you,

Subject: QUICK REVIEW REQUESTED: Site tour summaries

Charlotte, CDC has asked for a brief summary of the site tours to share with CEQ as a follow-up from a call they held with CEQ recently on the progress of the Action Plan. I wanted to provide you an opportunity to review since this will be going outside EPA to CEQ. We don't have much information as to amount of detail or the type of information CEQ was seeking (we did ask and Jackie did follow-up, but no further clarification followed from that), so our thought was to keep it minimal, basic and factual. Please see below and if you have any edits, please send them to Ksenija **by COB today or early tomorrow**. Thank you, Ksenija and Chris – and please add a short footnote as to what “ambient processing” means per my comment in the attached.

Thanks,
Nicole
